

## **BAI Announces Registered DoD RMF Practitioner (RDRP)**

19 July 2017

FOR IMMEDIATE RELEASE

Fairlawn, VA. —BAI Information Security is pleased to announce the launch of a new program called Registered DoD RMF Practitioner (RDRP) - a network of security professionals specializing in supporting the Risk Management Framework (RMF) in Department of Defense (DoD) programs. The requirements to join RDRP are very straightforward:

Step 1: Attend 4 days or more of RMF for DoD IT training.

Step 2: Complete the 50 question “RMF for DoD IT Competency Test” with a passing score of 70%.

Step 3: Remit the initial credentialing fee (No cost if you’ve completed BAI’s RMF 4-day training program within the past 12 months).

Being part of the RDRP registry not only adds resume value, it also shows employers and government officials that registrants have a comprehensive understanding of RMF as it is implemented within DoD. Registrants are also joining a community that fosters RMF inquiry as well as networking opportunities amongst colleagues.

RDRP maps to a variety of work roles as defined by The National Initiative for Cybersecurity Work Framework (NCWF). NCWF was developed in partnership with over 20 agencies and the federal departments to establish baseline qualifications in cybersecurity career development. BAI is confident qualifications such as RDRP will become more and more critical as NCWF is finalized and moved out of draft form.

BAI’s students who have completed RMF 4-day training within the past 12 months may simply go to [www.rmfm.org/rdrp](http://www.rmfm.org/rdrp) to begin the registration process.

### **About BAI**

BAI Information Security is a trusted provider of training and consulting services to the Department of Defense and other federal agencies, along with their supporting contractors and vendors. BAI’s core training curriculum is based on the Risk Management Framework (RMF), initially developed by the National Institute of Standards and Technology (NIST) and now implemented throughout the Department of Defense, Federal departments/agencies, and the Intelligence Community. To date, BAI has trained thousands of students internationally on RMF and related processes, and has provided consulting services to numerous government agencies and Fortune 500 companies. Founded in 1974, BAI is headquartered in Fairlawn, Virginia.
