

## BAI Announces eMASS Training Program

11 April 2017

FOR IMMEDIATE RELEASE

Fairlawn, VA. — BAI Information Security is now offering a training program focused on eMASS, the Department of Defense (DoD) Enterprise Mission Assurance Support Service. “The majority of DoD agencies have now “standardized” on eMASS as the online data repository and management system for their Risk Management Framework (RMF) efforts,” said BAI Principal Consultant Lon Berman. “We felt it was time to add eMASS training to complement our RMF training program.”

BAI will initially offer eMASS eSENTIALS™, a one-day training program that delivers practical “how to” guidance on the most commonly-used eMASS functions, including:

- System Registration
- Security Controls and Test Results
- Artifacts
- Asset Manager
- Plan of Action and Milestones (POA&M)

eMASS eSENTIALS is open to all students (government and contractors) with an interest in eMASS, particularly those who have previously completed *RMF for DoD IT Fundamentals* and *RMF for DoD IT In Depth* classes.

The class includes “simulated live operation” of eMASS, however students are not required to have an eMASS account, or even a DoD Common Access Card (CAC), to attend.

eMASS eSENTIALS will initially be offered on a regularly-scheduled basis as an online, instructor-led class, using our Online Personal Classroom™ technology. Classes will be held on the last Wednesday of each month, beginning 31 May 2017.

Additionally, organizations who arrange for “on-site” RMF training for a group of students will have the option of adding eMASS eSENTIALS as a fifth day of training (along with *RMF for DoD IT Fundamentals* and *RMF for DoD IT In Depth*).

### About BAI

BAI Information Security is a trusted provider of training and consulting services to the Department of Defense and other federal agencies, along with their supporting contractors and vendors. BAI's core training curriculum is based on the Risk Management Framework (RMF), initially developed by the National Institute of Standards and Technology (NIST) and now implemented throughout the Department of Defense, Federal departments/agencies, and the Intelligence Community. To date, BAI has trained thousands of students internationally on RMF and related processes, and has provided consulting services to numerous government agencies and Fortune 500 companies. Founded in 1974, BAI is headquartered in Fairlawn, Virginia.
