BAI Information Security
Training Program Prerequisites

RMF for DoD IT

A basic understanding of government technology programs and information systems

RMF for Federal Agencies

A basic understanding of government technology programs and information systems

Continuous Monitoring Training

A strong understanding of RMF, and it is highly recommended students complete the 4-day RMF training program prior to registration

eMASS Essential Training

eMASS eSSENTIALS is open to all students (government and contractors) with an interest in eMASS, particularly those who have previously completed RMF for DoD IT Fundamentals and RMF for DoD IT In Depth classes

RMF in the Cloud Training

A strong understanding of RMF, and it is highly recommended students complete the 4-day RMF training program prior to registration

CAP Examination Preparation Training

This training is intended to serve as an add-on to the RMF for DoD IT core curriculum which delivers the requisite content to sit for the CAP exam. It is expected that students enrolling in this course have completed RMF for DoD IT Fundamentals and RMF for DoD IT In-Depth.

CISSP Examination Preparation Training

Course Prerequisite:

An interest in taking the CISSP exam administered by (ISC)2.

Exam Prerequisite:

Candidates must have five years of cumulative paid full-time information technology work experience, of which two or more years must be in two or more of the eight domains of the (ISC)2 Common Body of Knowledge (CBK). An alternative option is to take and pass the CISSP exam to earn an Associate of (ISC)2 designation.

* Students can satisfy one year of required experience with a four-year college degree or an approved credentials from the CISSP Prerequisite pathway
