

“RMF – IT’S WHO WE ARE”

1-800-RMF-1903 (763-1903)

Risk Management Framework (RMF) Resource Center

www.rmfm.org

BAI is a leading provider of information security training and consulting services, specializing in the Risk Management Framework (RMF).

RMF Training Programs

Our flagship training program, RMF for DoD IT, offers an effective combination of “by the book” knowledge and practical, “get it done” guidance.

- **RMF for DoD IT Full Program (Four days)**
This comprehensive training program covers RMF policy background, publications, roles and responsibilities, life cycle, security controls, assessment procedures and documentation. The level of detail enables practitioners to immediately apply the training to their daily work. Students will gain an in-depth knowledge of the relevant DoD, NIST and CNSS publications along with the practical guidance needed to implement them in the work environment. Individual and group exercises help to reinforce RMF principles and practices
- **RMF for DoD Fundamentals Only (One day)**
This training program provides a high-level overview of RMF policies and practices.

Supplemental RMF-Related Training

These one-day training programs are designed to enhance your RMF-related skills in specialty areas.

- **Continuous Monitoring Overview Training Program (One Day)**
The program focuses on Information Security Continuous Monitoring (ISCM), which is one of the cornerstones of RMF.
- **eMASS eSENTIALS Training Program (One day)**
eMASS, is the web-based Government off-the-shelf (GOTS) solution for RMF process management and documentation. We provide “how to” guidance for the most commonly-used eMASS functions.
- **STIG 101 Training Program (One day)**
STIG 101 is designed to answer core questions and provide guidance on the implementation of DISA Security Technical Implementation Guides (STIGs).
- **RMF in the Cloud Training Program (One day)**
RMF in the Cloud Training is designed to answer foundational questions about RMF and cloud migration.
- **Certified Authorization Professional (CAP) Exam Preparation (One day)**
Backed by (ISC)2, the CAP credentialing curriculum aligns with RMF. This supplemental training is intended to serve as an add-on to the RMF for DoD IT program for those students wishing to take the CAP exam. Training includes study strategies and sample exam questions.

Professional Certification Training

- **Certified Information Systems Security Professional (CISSP) Training Program (Five days)**
Backed by (ISC)2, CISSP credentialing is the “gold standard” in cybersecurity. This five-day training is taught by an industry proven certification trainer who commands student exam pass rates in the 90th percentile.

How We Deliver Training

- **Classroom Training:** on a regularly-scheduled basis in several classroom locations around the country (see schedule below).
- **Online Training:** on a regularly-scheduled basis via live, instructor-led Online Personal Classroom™ technology.
- **On-Site Training:** If you have a group of trainees (normally 8 or more) and a suitable classroom facility, any of our training programs can be presented at your site *at a significantly reduced cost*.

Our Instructors

Our trainers have an average experience of 20+ years in information security and a rooted background in working with government technology systems.

Cost of Training

- RMF for DoD IT Full Program: \$1,935
- RMF for DoD IT Fundamentals Only: \$650
- Supplemental RMF One-day Programs: \$750
- CISSP Exam Preparation Training (includes exam voucher): \$3,195

Consulting Services

BAI consulting services enable our clients to succeed in RMF implementations by providing subject matter expert consulting services. We help our clients work through the RMF life cycle. Our consulting team provides direct assistance to DoD/Federal agencies, Product Developers/Vendors, and Service Providers as well as their supporting contractors as they work through the RMF process in pursuit of ATO.
