

Training Overview

RMF Project Management Advantage is a one-day course designed for RMF practitioners and/or managers at all levels with goals of utilizing project management best practices and strategies from Project Management Institute (PMI) as well other global industry proven project management standards.

Tired of hearing that RMF is failing and an inefficient process? Well, we certainly are. BAI RMF Resource Center has responded to this claim by creating **RMF Project Management Advantage**. The course was authored and is taught by a senior RMF practitioner and Project Management Professional (PMP) who is passionate about leveraging real-world RMF and project management experience to reduce RMF project costs and streamline the RMF process. If you are interested in decreasing RMF implementation time and cost, this course is for you!

RMF Project Management Advantage topics include:

- RMF Operation Order
- RACI Charts
- Self-assessment Worksheet
- Understanding Common Controls
- RMF 5 Steps (as projects)
- Controls Implementation Worksheet
- RMF Project Plan
- Reporting RMF Project Progress

Course Prerequisites

A prerequisite to this **RMF Project Management Advantage** course is a strong understanding of RMF; therefore, it is recommended students complete the 4-day RMF training program prior to attending or have experience implementing RMF.

Who should attend?

The **RMF Project Management Advantage** training program is suitable for government employees and contractors in DoD, federal “civil” agencies and the intelligence community, particularly those responsible for managing RMF projects.

Delivery Methods

RMF Project Management Advantage is offered on a regular basis as an online, instructor-led class, using our Online Personal Classroom™ technology.

RMF Project Management Advantage is also available as a “Friday supplemental class” to organizations wishing to obtain on-site or online RMF training for a “private group” of students.
